BACKGROUND INFORMATION:

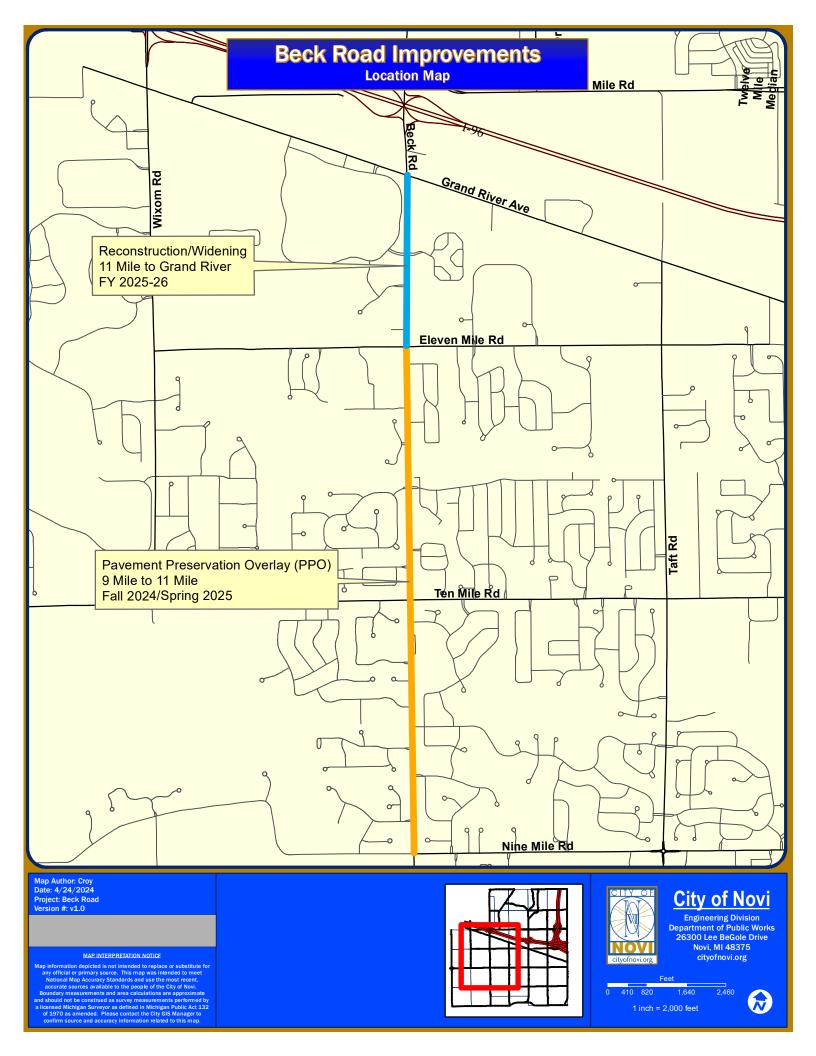

The pavement on Beck Road from 9 Mile Road to 11 Mile Road is in poor condition. DPW staff have been using different maintenance options to extend the pavement life until the planned Beck Road widening project comes to fruition. However, the road condition continues to deteriorate. The proposed pavement preservation overlay (PPO) would help keep the road from deteriorating further until additional funding is obtained for the widening project. City staff recommends issuing a change order to the contractor of the 2023 Capital Preventative Maintenance (CPM) project, Ajax Paving. Ajax has agreed to hold unit prices from the 2023 CPM project for the Beck Rd PPO, which would result in a significantly lower cost than what was estimated (approx. \$1M less).

City engineering consultant, AECOM, provided a proposal for design and construction administration. Due to the limited design needed for a PPO, AECOM proposed a lower fee percentage of 2% for the road design. The contract administration and geotechnical engineering services related to this project addition will be granted to the following pre-qualified firms using the fee percentages in the Agreements for Professional Engineering Services and Geotechnical Engineering Services for Public Projects.

Construction would begin after the Wixom Road project is completed, depending on the weather, and is expected to take two to three weeks to complete. If construction is unable to occur in 2024, it will be pushed back to spring 2025 under agreement with the contractor of a 4 % construction cost increase.
