The City of Novi is planning to improve its non-motorized transportation system. The proposed plan aims to provide safe and accessible transportation options for pedestrians and cyclists. The plan includes new bike lanes, sidewalks, and crosswalks to encourage active transportation and reduce traffic congestion.

Key elements of the plan include:
- **New Bike Lanes**: In addition to existing bike lanes, new bike lanes will be added in various locations to accommodate more cyclists.
- **New Sidewalks**: New sidewalks will be constructed in areas where they are needed to improve pedestrian safety.
- **Crosswalk Improvements**: Existing crosswalks will be upgraded to improve visibility and reduce accidents.

The plan also includes a comprehensive implementation strategy to ensure that the changes are made in a timely and efficient manner.

This map illustrates the proposed changes and highlights the key areas where improvements will be made. The City of Novi is committed to making our city more walkable and bike-friendly for all residents.
