The Grand River corridor features a wide variety of uses and destinations, including the Town Center, auto-oriented commercial development, the Suburban Showplace Collection, St. John’s Providence Park Hospital, industrial uses on both small and large scales, vacant land, and a handful of residential developments.

Use the post-its and dots provided to highlight problem areas, things you’d like to see more of, your ideas for improving the corridor, and your questions regarding the future of Grand River. For the purposes of this Master Plan, please be aware that we are primarily focusing on the corridor outside of the Town Center area.
