Agenda Item 2
December 22, 2014

SUBJECT: Approval to award an engineering services agreement with Orchard, Hiltz & McCliment for design engineering services related to the 2015 Neighborhood Road Program in the amount of \$114,300.

SUBMITTING DEPARTMENT: Department of Public Services, Engineering Division *RA* *BTC*

CITY MANAGER APPROVAL: *RA*

EXPENDITURE REQUIRED	\$ 114,300
AMOUNT BUDGETED	\$ 245,000
LINE ITEM NUMBER	203-203.00-805.435

BACKGROUND INFORMATION:

Each year, the City of Novi selects residential streets for reconstruction, repaving, repair, and/or rehabilitation based on PASER ratings, staff's field observations and resident concerns. Similar to the current year's program, the 2015 program is expected to consist of at least two separate contracts: one for concrete streets and one for asphalt streets. The approved FY 14-15 budget allocated \$2,400,000 for neighborhood roads, of which \$600,000 is already in design as an extension of the 2014 program and \$1,800,000 is being allocated to the 2015 Neighborhood Road Program. Staff will work with Orchard, Hiltz & McCliment (OHM) to develop a list of streets to be further evaluated and designed for inclusion in the 2015 program. This list will be distributed once the streets have been selected.

One of the primary goals of the Department of Public Services' asset management program is the preservation of the City's roadways to prevent costly reconstruction. Novi's neighborhood road and preventative maintenance programs are intended to result in an overall improvement in the quality of the City's roadways and consequently increase the overall PASER rating for the roadway network. The neighborhood road program will typically address large sections of streets that require significant rehabilitation. Rehabilitation techniques that will be considered include standard methods, such as mill and overlay, partial-depth and full-depth joint repairs; and will also include other emerging technologies such as pavement interlayers, asphalt recycling, full-depth reclamation, and the use of other materials and methods that improve the strength of the pavement and resistance to reflective cracking. The objective is to preserve good quality roads using lower-cost rehabilitation techniques, rather than allowing the roads to deteriorate to a point that requires road reconstruction involving much more effort at a higher cost. This type of rehabilitation is intended to limit further deterioration of existing pavement defects, and extend the service life of the pavement.

OHM will be assisting the Engineering Division with the design and construction engineering services for this project. The design fees for the project are based on the fixed fee schedule established in the Agreement for Professional Engineering Services for Public Projects for the City's three pre-qualified engineering consultants. The design fees for this project will be \$114,300 (6.35% of the estimated construction cost of \$1,800,000). (The construction value used for award is less than the budgeted construction amount to reserve a project contingency of 3%). The construction phase engineering fees will be awarded at the time of construction award and will be based on the contractor's bid and the fee percentage in the Agreement for Professional Engineering Services for Public Projects. A draft of the Supplemental Professional Engineering Services Agreement for this project is enclosed.

The 2015 Neighborhood Road Program will be designed over the winter months, and construction of this project is expected to commence in spring/summer 2015.

RECOMMENDED ACTION: Approval to award an engineering services agreement with Orchard, Hiltz & McCliment for design engineering services related to the 2015 Neighborhood Road Program in the amount of \$114,300.

Any claim for supplemental compensation must be in writing and accompanied by substantiating data.

When delays are caused by circumstances or conditions beyond the control of the Consultant as determined by the City, the Consultant shall be granted an extension of time for such reasonable period as may be mutually agreed upon between the parties, it being understood, however, that the permitting of the Consultant to proceed to complete the services, or any part of them, after the date to which the time of completion may have been extended, shall in no way operate as a waiver on the part of the City of any of its rights herein set forth.

Section 17. Assignment.

No portion of the project work, heretofore defined, shall be sublet, assigned, or otherwise disposed of except as herein provided or with the prior written consent of the City. Consent to sublet, assign, or otherwise dispose of any portion of the services shall not be construed to relieve the Consultant of any responsibility for the fulfillment of this agreement.

Section 18. Dispute Resolution.

The parties agree to try to resolve any disputes as to professional engineering services or otherwise in good faith. In the event that the parties cannot resolve any reasonable dispute, the parties agree to seek alternative dispute resolution methods agreeable to both parties and which are legally permissive at the time of the dispute. The parties agree to use their best efforts to resolve any good faith dispute within 90 (ninety) days notice to the other party. In the event the parties cannot resolve that dispute as set forth above, they may seek such remedies as may be permitted by law.
