

#### CITY of NOVI CITY COUNCIL

Agenda Item 4 June 2, 2014

**SUBJECT:** Approval of Resolution officially adopting MERS "Option B" for all future annual pension contributions.

**SUBMITTING DEPARTMENT: Finance** 

CITY MANAGER APPROVAL:

#### **BACKGROUND INFORMATION:**

The City is currently required to make annual contributions to the Michigan Employees' Retirement Systems of Michigan (MERS) Defined Benefit Pension Plan as determined by the actuaries. As part of the City's long-term financial plan, eight of the ten divisions within the MERS plan were closed in the last couple years to new members. The closing of the divisions, under the MERS plan, triggers an automatic acceleration in the pension contributions which will be reflected in future annual contributions (MERS refers to this as "Option A"). "Option A" is not a MERS provision unique to Novi, it's the same provision for all MERS member communities. Without any action by the City, all future contributions will be based on the current "Option A".

While the Mayor and City Council have expressed interest in increasing the contributions to the MERS plan to increase the overall funding level, the closing of eight of the ten divisions will almost **double** the current annual contribution of approximately \$2,500,000 in the next **five** years (see attached example of estimated future contributions for only five of the closed divisions). An increase in pension contributions of this magnitude, the majority of which are paid by the General Fund, would limit the city's ability to continue to invest in citywide capital and other service improvement type projects.

MERS has recognized that the current "Option A" can be difficult if not impossible for some member communities to fund without causing financial hardship so they have created and made available an "Option B." "Option B" still accelerates the amount of the pension contributions in the future years, but stretches it out over a longer period of time (see attached example of estimated future contributions for only five of the closed divisions). The increase in the annual pension contribution in the next five years would increase approximately fifty percent rather than doubling under "Option B".

**RECOMMENDED ACTION:** Approval of Resolution officially adopting MERS "Option B" for all future annual pension contributions.

### Resolution Adopting MERS "Option B" for all Future Annual Pension Contributions

WHEREAS, the City has closed most of the divisions of the Michigan Employees' Retirement Systems of Michigan (MERS) Defined Benefit Pension Plan which has resulted in the acceleration of all future employer contributions under MERS "Option A", and

WHEREAS, the Mayor and City wish to accelerate the funding of the MERS pension plan to improve the overall funding level but recognize the substantial short-term burden to the City buy staying with the current "Option A", and

WHEREAS, MERS has recognized that "Option A" may cause financial hardship on some of its member communities and has offered an "Option B" which still accelerates the contributions but over a longer period of time, and

WHEREAS, the change in funding options has no effect on retiree pension payments.

**NOW, THEREFORE, BE IT RESOLVED,** that the City Council elects to change from the current MERS "Option A" to MERS "Option B" for all future contributions and directs the finance director to work with MERS to incorporate the change in options into the next actuarial report assumptions.

I certify that the foregoing is a true and complete copy of a Resolution adopted by the City Council of the city of Novi at a regular Meeting held on this 2<sup>nd</sup> day of June, 2014.

Maryanne Cornelius, City Clerk
